WHO WE ARE

Beals Alliance was founded in 1978. Our corporate office is located in Folsom with project offices in Modesto, Bodega Bay and San Jose. Our staff are comprised of the perfect blending of education, technical and practical experience. And they all love sports! We have developed a technical expertise in the “science” of athletic facilities planning and design that exceeds others in the industry. Our client’s satisfaction is always our primary goal.

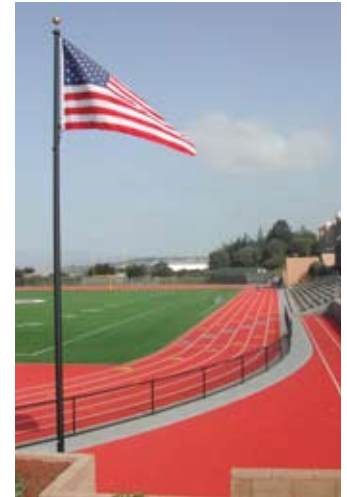

EXPERIENCE

Beals Alliance provides athletic facility design expertise for universities, colleges, community college districts, k-12 school districts, municipalities, counties, park and recreation districts, youth athletic associations, and semi-professional sports organizations. Schools, colleges and communities face ever increasing demands on existing facilities and difficulties constructing new facilities. We address each challenge systematically resulting in the highest level solution. By applying leading-edge technology, collaborative programs, community-outreach and sustainable design principals, our clients fulfill goals they never thought possible.

We have the specific knowledge and understanding of today’s athletic facility needs for high school (NFHS), community college (NJCAA) and collegiate (NCAA) competition. Over the past 20 years, Beals Alliance has completed athletic facility assessments, renovations, modernizations, new design and construction for over 100 public and private schools, community colleges and universities throughout California, Nevada, Arizona and Hawaii. We have completed 260 football/track facilities, 180 soccer specific venues, 100 baseball fields, and 110 softball venues.

PHILOSOPHY

At Beals Alliance, we believe that if you nurture relationships built on mutual respect, trust and friendship, success will follow. Better design and a successful project comes from a collaborative process. We provide our services to a wide range of clients through an interactive approach that incorporates the needs of athletes, coaches, directors, administrators and other stakeholders. As designers, our job is to create a collaborative environment, interpret specific needs and desires, and develop solid solutions. The result is a budget-friendly, sustainable, functional, maintainable, and attractive design.

▶ St. Ignatius Preparatory School Track & Field

▶ **“Beals Alliance is dedicated to designing athletic facilities that foster the development of youth and young adults. We strive to develop a collaborative partnership with our clients, educators, coaches, and athletes to design the safest, highest quality environments for sports and physical fitness.”**

PROJECT TYPES:

Campus-wide master plans

District-wide facility assessments

Baseball stadiums and practice facilities

Football stadiums and practice fields

Soccer fields

- Post Construction Review and Analysis
- Graphics

APPROACH

At Beals Alliance, we begin every project with the end user in mind. By involving the entire team in the project from programming to ribbon cutting, we can solicit input from all parties along the way. We have pioneered a process called the Interactive Workshop Environment (IWE) which uses technology to support the interactive planning and design of athletic facilities in a workshop environment. The process enables us to gather valuable input from coaches, athletic directors and administrators and involve them in the decision process. With IWE, we can respond to input by making immediate changes to design, and enable all participants to visualize and understand their impact. This tool is very beneficial in maximizing program requirements and usable space in minimal time.

Beals Alliance understands the importance of validating project goals and objectives and defining the work product, timeline and milestones prior to proceeding with preliminary planning and design. The combination of the pre-programming phase of our services, the IWE, and our experience in this specialized field minimize the opportunity for programming changes to occur. Our role throughout the construction process is to protect the client's interests and to make sure each project is constructed according to plan, within the amount specified and on schedule. We work diligently to ensure the success of every project – our reputation depends on it.

LEADERSHIP

The company was founded by Jay Beals. He continues to be the managing principal and president. Jay has 40 years of experience in the field of landscape architecture with an emphasis in athletic facility planning and design. As a consultant to public agencies, Jay has concentrated his efforts in designing interactive public projects that benefit youth and communities. He has provided successful facilitation, planning, and design of hundreds of public space projects utilizing cooperative community design processes and client partnerships. Jay's experience in multi-jurisdictional projects provides keen insight and strong leadership for the project team. He was also the founding president of the Northern California Chapter of Sports Turf Managers Association and was instrumental in the Chapter's widening of memberships from College, University, professional sports members, and K-12 school district members. Jay is involved in various philanthropic activities including services for the development of a memorial to our military and the renovation of Camp Fire Day Camp at Riverbend Park in Sacramento, in which he raised more than \$50,000 through a golf tournament with his Rotary Club.

▶ **At beals alliance, we pride ourselves on our innovative vision. We always make an effort to interpret what is given, offer alternatives, and develop unique solutions.**

▶ **Beals Alliance** utilizes an Interactive Workshop Environment (IWE) to support collaborative design.
